

Course Outcomes

Academic Year 2018-19

	Discrete Mathematics
C201.1	Explain and apply Set theory, Logic, Relation and Function to solve problems.
C201.2	Calculate number of possible outcomes of elementary combinatorial processes.
C201.3	Analyze mathematical data structures, Tree and Graph to solve problems.
C201.4	Explain and solve problems on algebraic structure and coding theory using mathematical methods.

	Digital Electronics and Logic Design
C202.1	Relate and Compare the functionality of Combinational and Sequential Circuits.
C202.2	Define the concept of ASM charts and Analyze the digital circuits using VHDL
C202.3	Apply and compare the functionalities, applicability of Logic Families and programmable logic devices.
C202.4	Illustrate concepts of Microcontroller 8051 and Programming Model.

Progressive Education Society's
Modern College of Engineering
DEPARTMENT OF COMPUTER ENGINEERING

	Data Structures and Algorithms
C203.1	Relate and Solve time complexities of various algorithms and recurrence relations.
C203.2	Solve problems using sequential, linked list and GLL Concepts of data structure.
C203.3	Develop algorithms using the concepts of data structure such as stack and queue.
C203.4	Compare and Make use of different searching and sorting technique based on space and time complexity of the algorithm.

	Computer Organization and Architecture
204.1	Illustrate computer architecture design and solve problems of arithmetic operations.
204.2	Explain computer memory system and I/O systems.
204.3	Explain instruction set architecture of a processor.
204.4	Differentiate and illustrate design alternatives in the processor organization.

Progressive Education Society's
Modern College of Engineering
DEPARTMENT OF COMPUTER ENGINEERING

	Object Oriented Programming
C205.1	Define concepts of OOP.
C205.2	Write programming applications using inheritance, polymorphism and virtual function.
C205.3	Explain templates, Standard Template Library and exception handling in C++ programming.
C205.4	Explain concepts of file handling in Object Oriented Programming.

	Digital Electronics Lab
C206.1	Simplify and Implement Boolean expressions for designing digital circuits using K-Maps.
C206.2	Design and implement Sequential and Combinational digital circuits as per the specifications.
C206.3	Design simple digital circuits using VHDL
C206.4	Compare the functionalities, properties and applicability of Logic Families.

Progressive Education Society's
Modern College of Engineering
DEPARTMENT OF COMPUTER ENGINEERING

	Data Structures Lab
C207.1	Experiment with various set operations and matrix operations using Array.
C207.2	Construct real world problems using singly and doubly linear data structure.
C207.3	Test for “Expression is well parenthesized or not” and Expression conversion using Stack concepts.
C207.4	Simplify applications based on the concept of Simple and circular queue.
C207.5	Compare Searching and Sorting techniques based on time complexity.

	Object Oriented Programming Lab
C208.1	Analyze and develop solutions for real time problems using features of OOP in C++.
C208.2	Develop programs using templates, exception handling and file handling concepts of OOPs.
C208.3	Utilize STL to develop C++ program for linked and sequential organisation.
C208.4	Design and develop mini project using features of OOP.

Progressive Education Society's
Modern College of Engineering
DEPARTMENT OF COMPUTER ENGINEERING

	Soft Skills
C209.1	Establish effective communication among Peers.
C209.2	Prepare effective reports, technical documents and presentations.
C209.3	Cope with stress, possess human values, morals and ethics.
C209.4	Express inter personal skills and soft skills.

	Audit Course 1
C210.1	Describe the basics of German language.
C210.2	Express the knowledge in German language.
C210.3	Developed interest to pursue professional German language course.

Progressive Education Society's
Modern College of Engineering
DEPARTMENT OF COMPUTER ENGINEERING

	Engineering Maths - III
C211.1	Solve higher order linear Differential equations and model L-C-R electrical circuits.
C211.2	Evaluate Fourier Transform, Inverse Fourier Transform, Z-transform, and Inverse Z-transform.
C211.3	Analyze given data using measures of central tendency, dispersion, moments, skewness, kurtosis, correlation-regression.
C211.4	Apply techniques of Probability, Probability Distributions and Chi-Square Test to analyze given data
C211.5	Apply vector differential operators to deal with Directional Derivatives, Vector Identities, Scalar Potential, Solenoidal, Irrotational and Conservative Fields, Gauss divergence, Stokes theorem to evaluate Line integral, Surface integral, volume integrals and solve problems in Electromagnetic fields.
C211.6	Check analytic functions using Cauchy Riemann Theorem, evaluate bilinear transformation and apply Cauchy's integral theorem, residue theorem to evaluate line integrals in the complex plane.

	Computer Graphics
C212.1	Define Graphics primitives and Explain polygon clipping algorithms
C212.2	Illustrate 2D and 3D Transformations and Projections in the domain of Computer Graphics.
C212.3	Explain Illumination models and shading algorithm.
C212.4	Apply the logic to implement animation and gaming programs.

Progressive Education Society's
Modern College of Engineering
DEPARTMENT OF COMPUTER ENGINEERING

	Advanced Data Structures
C213.1	Experiment with appropriate advanced data structure like tree and graph.
C213.2	Implement solutions for real world problems using hash tables and search trees
C213.3	Explain different indexing techniques and multiway trees.
C213.4	Organize data using different file organizations.

	Microprocessor
C214.1	Illustrate basic model, system architecture and memory management of 80386DX microprocessor.
C214.2	Explain concepts of multitasking, protection, Exception and Interrupt handling of 80386DX.
C214.3	Find errors and Debug programs written in assembly language.
C214.4	Explain signals and bus cycles of 80386 and Illustrate the architecture of 80387 coprocessor.

Progressive Education Society's
Modern College of Engineering
DEPARTMENT OF COMPUTER ENGINEERING

	Principles of Programming Languages
C215.1	Explain Significance of syntax and semantics for programming languages to write efficient and effective programs.
C215.2	Explain various data types, programming structure and different programming paradigms
C215.3	Describe and Apply OOP features in JAVA programming.
C215.4	Discuss exception handling and basics of Applet in JAVA.

	Computer Graphics Lab
C216.1	Explain and Implement line drawing and circle drawing algorithms in computer graphics.
C216.2	Develop polygon filling and clipping algorithms.
C216.3	Explain and Implement Curve Generation algorithms using concept of fractals.
C216.4	Apply 2D and 3D transformations for objects.

Progressive Education Society's
Modern College of Engineering
DEPARTMENT OF COMPUTER ENGINEERING

	Advanced Data Structures Lab
C217.1	Apply the concepts of tree and graph to solve real world problems.
C217.2	Implement hash tables and search trees.
C217.3	Design and implement different STLs to solve the problems of various domains.
C217.4	Write programs using Java Concepts.

	Microprocessor Lab
C218.1	Write and execute assembly language programs (ALP) to perform data transfer operations.
C218.2	Experiment with processor and coprocessor by writing ALPs to perform arithmetic operations.
C218.3	Develop ALPs to perform logical operations.
C218.4	Experiment with control instructions to write ALPs to control operations of the processor.

Progressive Education Society's
Modern College of Engineering
DEPARTMENT OF COMPUTER ENGINEERING

	Audit Course 2
C219.1	Compare the importance of gym and yoga
C219.2	Explain the significance of stress management
C219.3	Explain the power of concentration, focus and awareness
C219.4	Identify the influence of ayurveda in healthcare

Progressive Education Society's
Modern College of Engineering
DEPARTMENT OF COMPUTER ENGINEERING

	Theory of Computation
C301.1	Interpret basic concepts of formal language theory and finite automata.
C301.2	Analyze and construct the finite automata for regular expression.
C301.3	Utilize Context Free Grammar to define language.
C301.4	Construct Turing machines for different languages.
C301.5	Build a Push Down Automata for a given Context Free Language.
C301.6	Analyze the algorithmic problems into P and NP.

	Database Management Systems (DBMS)
C302.1	Illustrate the basic concepts of DBMS and Construct E-R Model.
C302.2	Develop queries using Structure Query Language SQL and PL/ SQL for creation and manipulation of Database.
C302.3	Analyze and apply the concepts of normalization in relational database System.
C302.4	Demonstrate Database Transactions and Transaction Management.
C302.5	Explain different database architecture.

Progressive Education Society's
Modern College of Engineering
DEPARTMENT OF COMPUTER ENGINEERING

	Software Engineering & Project Management
C303.1	Choose the process model, analyze the software requirements.
C303.2	Design a software system and Explain the architecture, user interface, components for a software system.
C303.3	Determine risks and estimate the project cost and schedule for Software being developed.
C303.4	Explain a testing strategy for software system and write test cases.

	Information Systems & Engineering Economics
C304.1	Explain various forms of information systems & its applications in an organization.
C304.2	Explain the role of the major types of information systems in a business environment and their relationship to each other.
C304.3	Solve problems on time value of money.
C304.4	Apply the appropriate engineering economics and analyze the software enterprises from similar domains.
C304.5	Explain the effects of depreciation, income taxes, inflation and price change in engineering economics.

Progressive Education Society's
Modern College of Engineering
DEPARTMENT OF COMPUTER ENGINEERING

	Computer Networks (CN)
C305.1	Explain the fundamental concepts of wired and wireless Networks.
C305.2	Solve the design issues related to sub layers of Data Link Layer.
C305.3	Identify different routing protocols at Network Layer.
C305.4	Analyze data flow through transport and application layers of TCP/IP model.

	Skills Development Lab
C306.1	Make use of data structures and collection framework to develop a system.
C306.2	Apply socket programming, JDBC, multithreading concept to develop a system.
C306.3	Develop a real-time application in team and demonstrate it.
C306.4	Solve problems of critical thinking, logical ability and vocabulary skills

Progressive Education Society's
Modern College of Engineering
DEPARTMENT OF COMPUTER ENGINEERING

	DBMS Lab
C307.1	Design and implement database using SQL queries.
C307.2	Solve real world problems using PL/SQL for creation and manipulation of Database.
C307.3	Compile queries for NOSQL databases.
C307.4	Build a database application using basic and advanced database concepts.

	CN Lab
C308.1	Assess the network for data transfer, error control and flow control.
C308.2	Construct routing algorithm with the help of modern tools.
C308.3	Analyze socket programming at transport layer.
C308.4	Elaborate the services provided by application layer across the network.

Progressive Education Society's
Modern College of Engineering
DEPARTMENT OF COMPUTER ENGINEERING

	Audit Course 3
C309.1	Explain the elements of Information security and models of N/W security.
C309.2	Classify different authentication methods, protocols and services.
C309.3	List different standards for electronic mail security and web security.
C309.4	Explain intrusion detection system, firewall and hacking.

	Design & Analysis of Algorithms
C310.1	Explain the fundamentals of algorithm using design methods.
C310.2	Apply the appropriate algorithmic strategy to solve problems.
C310.3	Analyze the time and space complexity of various algorithms and problems.
C310.4	Explain the concepts of Multithreaded and Distributed Algorithms.

	Systems Programming & Operating System (SP&OS)
C311.1	Relate and Explain the functioning of system software.
C311.2	Analyze Language Translators.
C311.3	Explain and Analyze process structure, its management and process sub system.
C311.4	Explain memory management and I/O management.

Progressive Education Society's
Modern College of Engineering
DEPARTMENT OF COMPUTER ENGINEERING

	Embedded Systems & Internet of Things
C312.1	Explain basics of embedded system and internet of things.
C312.2	Describe various IoT platform specifications & Explain basic building blocks of IoT devices.
C312.3	List and Explain IoT Protocols and Security for real time applications.
C312.4	Explain IoT physical servers and web services.

	Software Modeling and Design
C313.1	Compare Software Methodologies and Model a software system using unified Modeling Language.
C313.2	Illustrate the architecture of the software to be developed.
C313.3	Identify design patterns in software systems and discover the best suited pattern for a particular System.
C313.4	Identify test cases for various applications and Evaluate the quality of software system.

Progressive Education Society's
Modern College of Engineering
DEPARTMENT OF COMPUTER ENGINEERING

	Web Technology
C314.1	Explain web development process and Develop web applications using front end tools
C314.2	Explain client side, server side technologies and Develop web applications using it.
C314.3	Compare client side frameworks with server side frameworks and Develop web applications using it.
C314.4	Develop web applications using web services and Content Management System.

	Seminar & Technical Communication
C315.1	Identify & Choose the appropriate domain (area).
C315.2	Summarize the literature survey on problems and deduce the problem statement.
C315.3	Compile the documents for an identified problem.
C315.4	Express the idea, concepts and solution of the selected problem ethically as an individual.

Progressive Education Society's
Modern College of Engineering
DEPARTMENT OF COMPUTER ENGINEERING

	Web Technology Lab
C316.1	Apply the concepts of web server installation, configuration and Design & Develop a web application using Front End Tools.
C316.2	Design & Develop a web application using suitable client side and server side web technologies.
C316.3	Develop a web application using Client and Server Side Frameworks.
C316.4	Design & Develop a web application using Web Services or Content Management System.

	SP & OS Lab
C317.1	Design and Develop pass – I and pass – II of two pass assembler and macroprocessor.
C317.2	Construct lexical analyzer and parsers using Lex and YACC tools.
C317.3	Write a program to create Dynamic Link Libraries.
C317.4	Compare and Develop various scheduling schemes.

Progressive Education Society's
Modern College of Engineering
DEPARTMENT OF COMPUTER ENGINEERING

	ES & IoT Lab
C318.1	Compare the different ARM based micro controllers and demonstrate the connectivity with peripherals.
C318.2	Develop real time application using Raspberry-Pi, Peripherals and sensors
C318.3	Develop web applications using Zigbee module and cloud on Raspberry-Pi/Beagle board.
C318.4	Develop an IoT based Real time application in a team.

	Audit Course 4
C319.1	Create blogs to manage content distribution.
C319.2	Utilize Social Listening tools to create timely, relevant content.
C319.3	Understand Social Media policies that combine business objectives with appropriate use of social media channels and content.
C319.4	Create content calendar for social media platforms.

Progressive Education Society's
Modern College of Engineering
DEPARTMENT OF COMPUTER ENGINEERING

	High Performance Computing
C401.1	Explain the basics of parallel computing.
C401.2	Develop an efficient parallel algorithm to solve a problem.
C401.3	Analyze and measure performance of parallel programs.
C401.4	Explain the logic to parallelize the sorting and graph algorithms.

	Artificial Intelligence and Robotics
C402.1	Choose a search strategy and apply it to solve uninformed/ informed/ heuristic search.
C402.2	Analyze and solve problems related to planning and constraint satisfaction.
C402.3	Represent and solve problems related to certain knowledge and reasoning.
C402.4	Explain significance of natural language processing, information retrieval and types of learning.
C402.5	Explain concepts of robot components and real world robot applications.

Progressive Education Society's
Modern College of Engineering
DEPARTMENT OF COMPUTER ENGINEERING

	Data Analytics
C403.1	Explain the basic concept of Data Analytics.
C403.2	Apply an appropriate algorithmic strategy to solve problems of data.
C403.3	Analyze and Compare various algorithmic strategy related to data.
C403.4	Explain the basics of Tools used for unstructured data.

	Data Mining and Warehousing
C404D.1	Explain data Mining concepts and Apply pre-processing techniques.
C404D.2	Explain data warehouse concept and architecture and make use of various OLAP operations.
C404D.3	Identify and Choose data similarity and dissimilarity techniques.
C404D.4	Apply Association rule mining techniques and Analyze patterns.
C404D.5	Apply classification algorithms and Analyse it's performance.

Progressive Education Society's
Modern College of Engineering
DEPARTMENT OF COMPUTER ENGINEERING

	Software Testing and Quality Assurance
C405B.1	Explain basic concepts in software testing and quality assurance.
C405B.2	Prepare project test plan and write test cases for testing.
C405B.3	Make use of recent automation tool for software testing.
C405B.4	Explain quality management and identify the software quality tools to be used for a system.

	Laboratory Practice I
C406.1	Develop and analyze various parallel programs.
C406.2	Implement AI algorithmic strategies for solving various problems.
C406.3	Analyze various datasets using data analytics techniques and tool.
C406.4	Design and develop the applications based on the concepts of parallel algorithm, robotics and data analysis.

Progressive Education Society's
Modern College of Engineering
DEPARTMENT OF COMPUTER ENGINEERING

	Laboratory Practice II
C407.1	Apply data mining techniques for given data set using data mining Tools.
C407.2	Analyze classification algorithms using data mining Tool.
C407.3	Develop an application and Apply black box, white box testing.
C407.4	Apply automation tool on web based application and generate test reports.

	Project Work Stage I
C408.1	Choose the members of the team and select the domain for project work.
C408.2	Summarize the literature survey on techniques / algorithms for the domain and decide the problem statement of the project.
C408.3	Analyze the problem statement and compile the SRS, plan and design solution to the problem and estimate the project cost.
C408.4	Inculcate confidence, ethics and present themselves in a professional manner as a team.

Progressive Education Society's
Modern College of Engineering
DEPARTMENT OF COMPUTER ENGINEERING

	Audit Course 5
C409.1	Apply professional and technical skills.
C409.2	Make use of modern technologies.
C409.3	Extend self-directed learning for advanced courses.

	Machine Learning
C410.1	Apply preprocessing methods to prepare training data set for machine learning.
C410.2	Explain and apply regression techniques.
C410.3	Explain and apply supervised machine learning.
C410.4	Explain clustering techniques and deep network.

Progressive Education Society's
Modern College of Engineering
DEPARTMENT OF COMPUTER ENGINEERING

	Information and Cyber Security
C411.1	Inspect Network security architecture.
C411.2	Analyze and compare symmetric key & asymmetric key.
C411.3	Evaluate various cryptography measures to ensure privacy & confidentiality.
C411.4	Classify the Indian cyber laws.

	Compilers
C412B.1	Apply the knowledge of LEX and YACC to Develop LEX and parser.
C412B.2	Construct different types of grammar and Apply it for intermediate code generation.
C412B.3	Compare and Contrast different storage management schemes.
C412B.4	Explain Code generation and Identify sources for code optimization.

	Cloud Computing
C413C.1	Explain the basic concept of Cloud Computing & Compare different types of parser
C413C.2	Make use of Virtualization technique
C413C.3	Select appropriate AWS Services & Explain role of IOT in Cloud Computing
C413C.4	Explain future cloud computing techniques & Dockers Workflow.

	Business Intelligence
C413D.1	Apply basics of Business Intelligence and Knowledge Delivery techniques to analyze the data.
C413D.2	Explain concepts, techniques and applications of Decision Support System.
C413D.3	Explain & Apply various data Pre-processing techniques.
C413D.4	Apply various Data Mining Techniques and explain business intelligence applications in various sectors.

	Laboratory Practice III
C414.1	Analyze the data set and apply different supervised Learning techniques.
C414.2	Analyze the data set and apply different unsupervised Learning techniques.
C414.3	Apply standard encryption techniques to provide Security.
C414.4	Apply an algorithm for authentication and Confidentiality.

Progressive Education Society's
Modern College of Engineering
DEPARTMENT OF COMPUTER ENGINEERING

	Laboratory Practice IV
C415.1	Construct Lexical analyzer and Parsers using LEX and YACC tools.
C415.2	Make use of various code optimization and generation algorithms to build the compiler.
C415.3	Apply BIA techniques to analyze the data. / Install, configure and develop a Cloud.
C415.4	Analyze the data set using Business Intelligence tools. / Implement virtualization in cloud computing.

	Project Work Stage II
C416.1	Make use of various modern technologies / tools required to develop the project.
C416.2	Evaluate quality and performance of the project, and ensure environmental context and sustainability.
C416.3	Compile the project report and demonstrate the working of the project.
C416.4	Inculcate confidence, ethics and present themselves in a professional manner as a team.

Progressive Education Society's
Modern College of Engineering
DEPARTMENT OF COMPUTER ENGINEERING

	Audit Course 6
C417.1	Apply professional and technical skills.
C417.2	Make use of modern technologies.
C417.3	Extend self-directed learning for advanced courses.

Progressive Education Society's
Modern College of Engineering
DEPARTMENT OF COMPUTER ENGINEERING
