

PROGRESSIVE EDUCATION SOCIETY'S MODERN COLLEGE OF ENGINEERING, PUNE

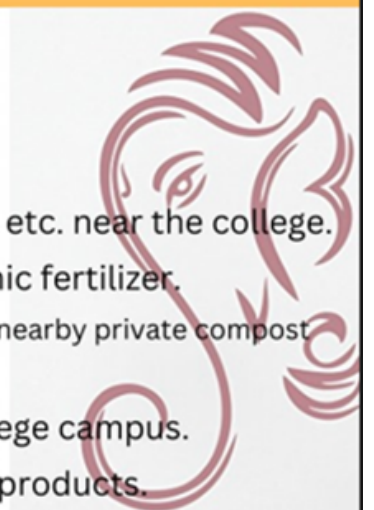

***Be a part of Green Club - Awareness drive towards
Ganesh Utsav, a Step towards sustainability!!***

**Let's collect the *Nirmalya* generated during the
festival and process it scientifically!**

This activity can be organized in various ways:

- *Nirmalya* can be collected from the households, Ganesh Mandals, etc. near the college.
- Collected *Nirmalya* can be composted to make good quality organic fertilizer.
(This can be planned within the college campus, local body's compost plant, at nearby private compost plant, in collaboration with **local NGOs** or in any other ways)
- The compost made can be utilized for the trees in and around college campus.
- Also, collected *Nirmalya* can be used for making other innovative products.
